

Digging Deeper Into Data Teams

August 3, 2016

Workshop #006-17

Green River Regional Educational Cooperative • 230 Technology Way • Bowling Green, KY

GRREC is pleased to offer this training for L2L schools only. Nicole Law will “Dig Deeper” into Data Teams by stretching your knowledge of and ability to effectively conduct Data Teams. What is the first step in transferring planning to the classroom? What is the next step after the Data Team meeting? What if Data Teams are not working as planned? These and other questions will be answered by Nicole during this all-day workshop.

Dr. Nicole Law is a Senior Fellow with the International Center for Leadership in Education. Nicole uses her expertise to present professional learning on Decision Making for Results, Data Teams, 90/90/90 School Improvement, Common Core State Standards, Power Strategies for Effective Teaching, Culturally Responsive Teaching and Leadership Practices and Accelerating Academic Achievement of English Learners, just to name a few.

Before joining the ICLE, Dr. Law worked as a Senior Professional Development Associate for The Leadership and Learning Center, where she developed intellectual property in areas of leadership and high-yield strategies, led seminars in areas related to curriculum, instruction, and assessment, and coached teachers and principals through the school improvement process.

Dr. Law completed her doctorate in Educational Leadership and Policy. Her dissertation concentrated on the principal’s role in increasing teacher implementation of effective instructional practices. She also co-authored “The Reflective Leader: Implementing a Multidimensional Leadership Performance System.” Leadership is Dr. Law’s passion; she has worked with numerous principals and district leaders on the implementation of Data Teams in the United States and Canada in order to implement and sustain a data driven process.

She is accused of not living in the world of standardized tests and stringent accountability measures, but rather living in the world of learning and achievement for all. As an elementary principal, she guided her teachers through the creation of formative assessments, authentic performance tasks, positive behavioral interventions, and the implementation of rigorous instructional practices. Nicole’s leadership allowed her to lead her school through a transformation in both school culture and academic instruction.

Nicole has received various recognitions throughout her career. One of many, was the 2008 National Milken Award from the state of Indiana. Nicole resides in Indianapolis, Indiana with her husband, Stan and son, Kyle.
